

## MOVING FORWARD!

After review meetings with the township administration, Hickory Woods Park Phase I will be divided into 2 phases; Phase 1a and Phase 1b (with a successful DNR Trust Fund grant); or Phase 1a and Phase 1b (without a successful grant application). Pictured on this page is what the park would conceptually look like with a successful grant award. Phase 1a is scheduled for construction this summer/fall and will include earthwork, approximately 3,800 linear feet of 8' wide bituminous multi-use trail, 500 linear feet 8' wide limestone trail, playground equipment, shade structure and landscaping. Phase 1b (with a successful grant) would include additional multi-use trail work, a new 50 car parking lot and entrance drive, restroom facility, pond enhancement for storm water site management, benches, interpretive and educational signage, and additional landscaping. Later phases, as funding becomes available, will see additional playground locations, bio swales, a pavilion, and additional natural systems restoration.
